Our Heritage

Since 1997, founders John Fearon and James Bassant have shared a passion for British lighting design and a vision to create products with distinctive quality. The insight gained over this time influences our comprehensive range of lighting for hospitality, residential, and commercial applications. Underpinned by a meticulous attention to detail, each design balances high performance with our commitment to sustainable, timeless design.

Timeless Design

Designing products in-house is at the core of what we do. Original and refined, our ethos remains simple, to deliver pared-down aesthetics that enhance surroundings for years to come.

Different by Detail

Our conscious choices ensure every product stands out. Whether investing in manufacturing techniques, advanced engineering solutions, or selecting the best materials, we always focus on the finer details.

Creating a Sustainable Future

Responsible design is about being mindful of the whole lifecycle of our products. From the initial concept through to the end of a luminaire's life. Our three prioritised commitments guide each decision we make and are linked to the UN Global Goals for Sustainable Development.

Net Zero

Committed to going further than carbon neutrality, we are actively reducing emissions to as close to zero as possible across our entire value chain.

Astro Circular

Transforming our approach to design and engineering, we are generating new ways to lengthen the lifespan of our products and ensure that circular loops, such as *reuse, repair, and recycle* are adopted.

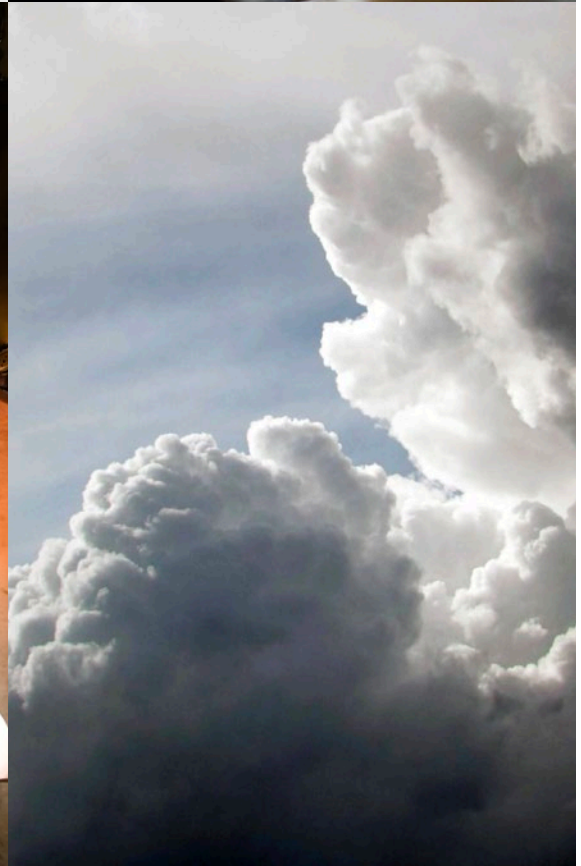

Light For All

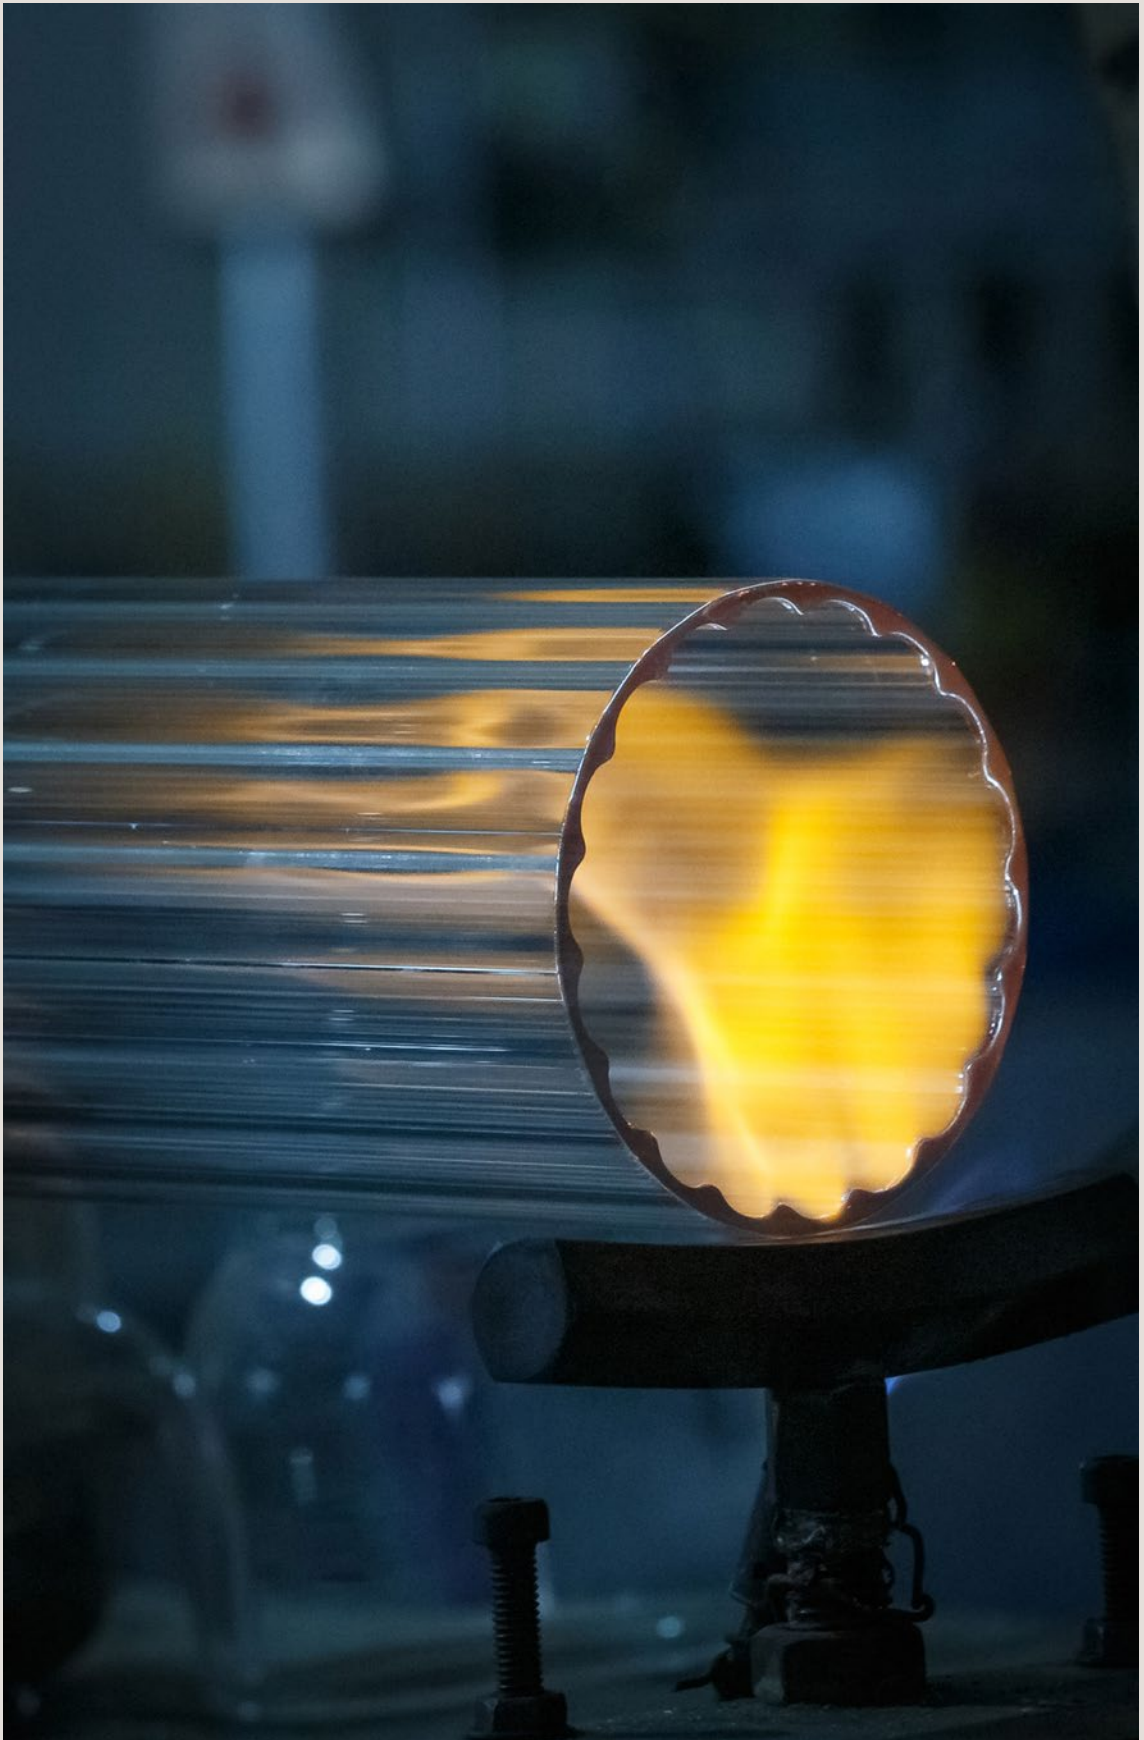

Nearly 600 million people across sub-Saharan Africa lack access to light but this can change instantly with a simple solar light. Our partnership with global charity SolarAid, aims to spread awareness of this global energy crisis and support the most remote communities in Malawi and Zambia with clean, safe, solar power.
