

Tweeter

Ex-Centric Rotation System.

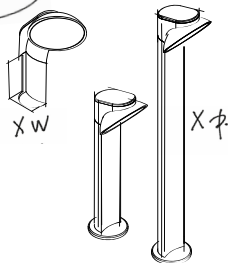

RECESSED

SURFACE

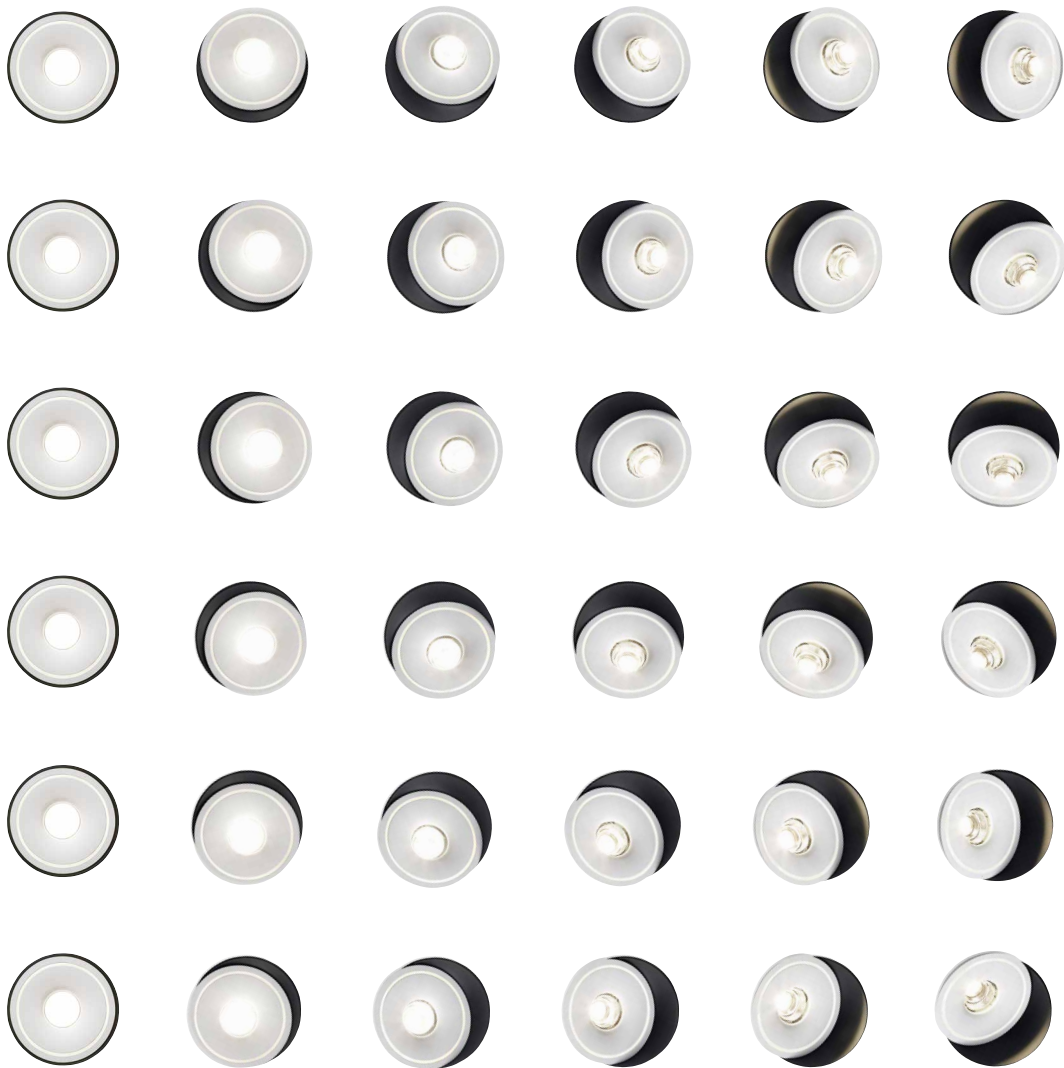

EXTERIOR

TWEETER

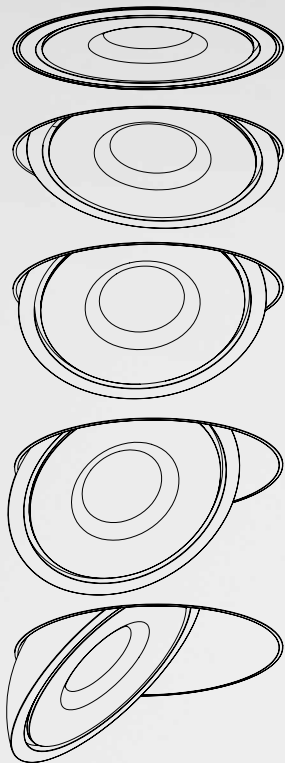

introduces new levels in flexibility,
both in movement as in lighting
application, destined to become a
longstanding classic.

With Tweeter Delta Light® introduces the
EX-CENTRIC ROTATION SYSTEM®
The ERS is characterized by an asymmetrical
hinge joint, combining extreme rotation and
tilting abilities, all in one swift whirling motion.

The application of the ERS not only
upgrades movement of the fixture,
but more importantly also provides
ADVANCED LIGHTING ABILITIES.

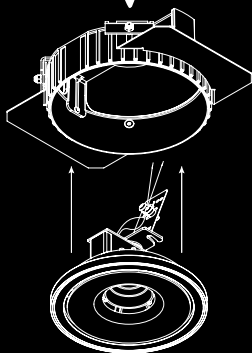

The **DOUBLE SHELL** design
prevents ceiling exposure,
while the flexible inner shell tailors
for any lighting need.

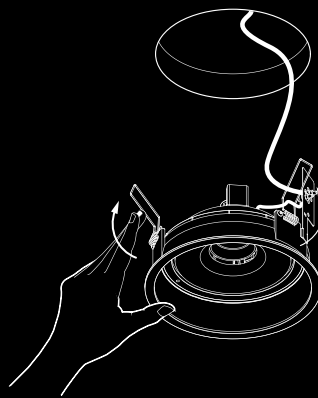

Ultimate refinement is reached with the **OREO**: principle a subtle aureole of light circling around the central led, for improved lighting aesthetics.

EASY INSTALLATION

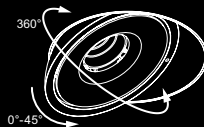

**TWEETER
TRIMLESS**

**TWEETER
ST D**

No visible wires / No visible hinge joint

TWEETER Ø134

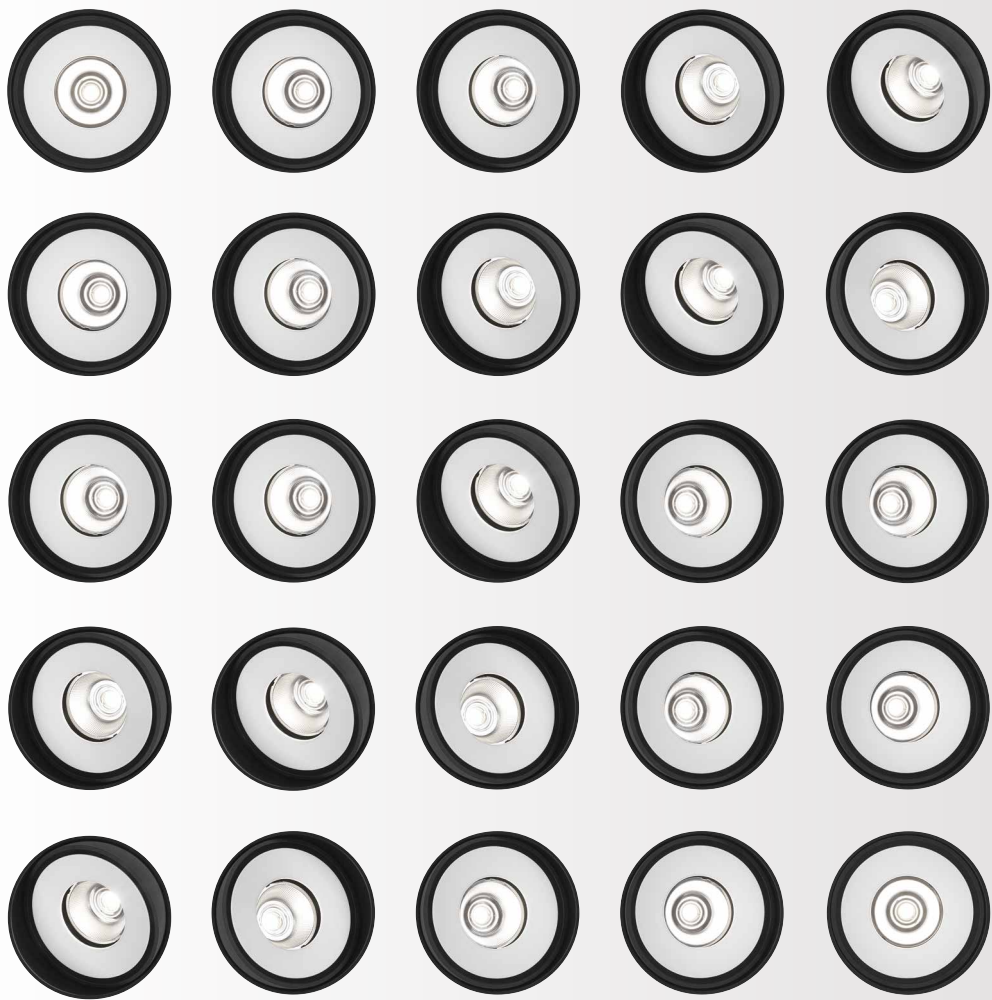

TWEETER M Ø96

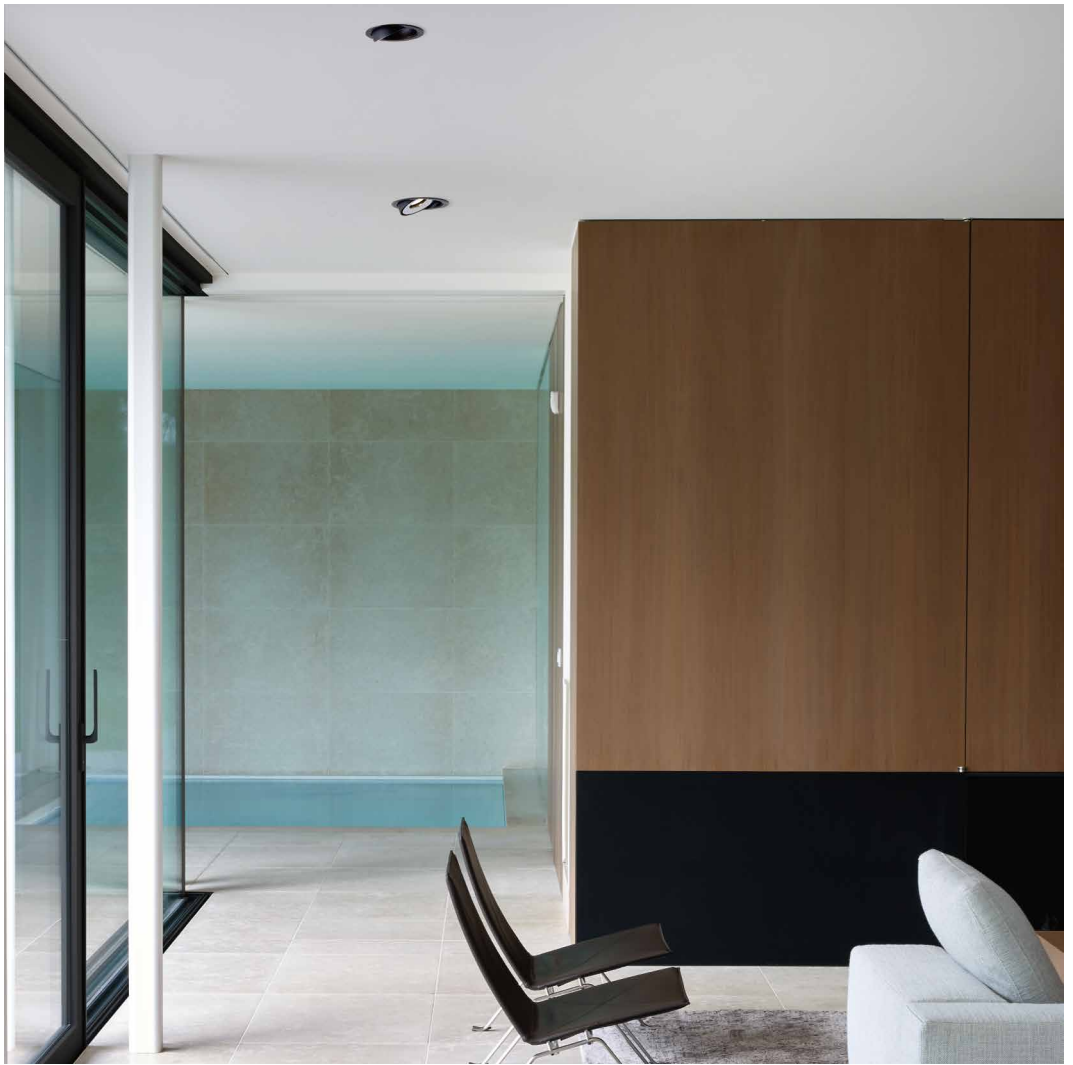

TWEETER M

Originally designed to perfectly fit a QR111 lamp, its diameter was decisive for Tweeter's dimensions.

LED technology allows us to reduce size, but not reduce impact.

TWEETER M ST

Allows for an easy installation as the Small Trim covers the hole perfectly.

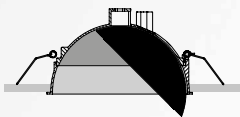

TWEETER TRIMLESS

TWEETER M ON 1/2

A surface mounted luminaire with
1 or 2 curious light shells.

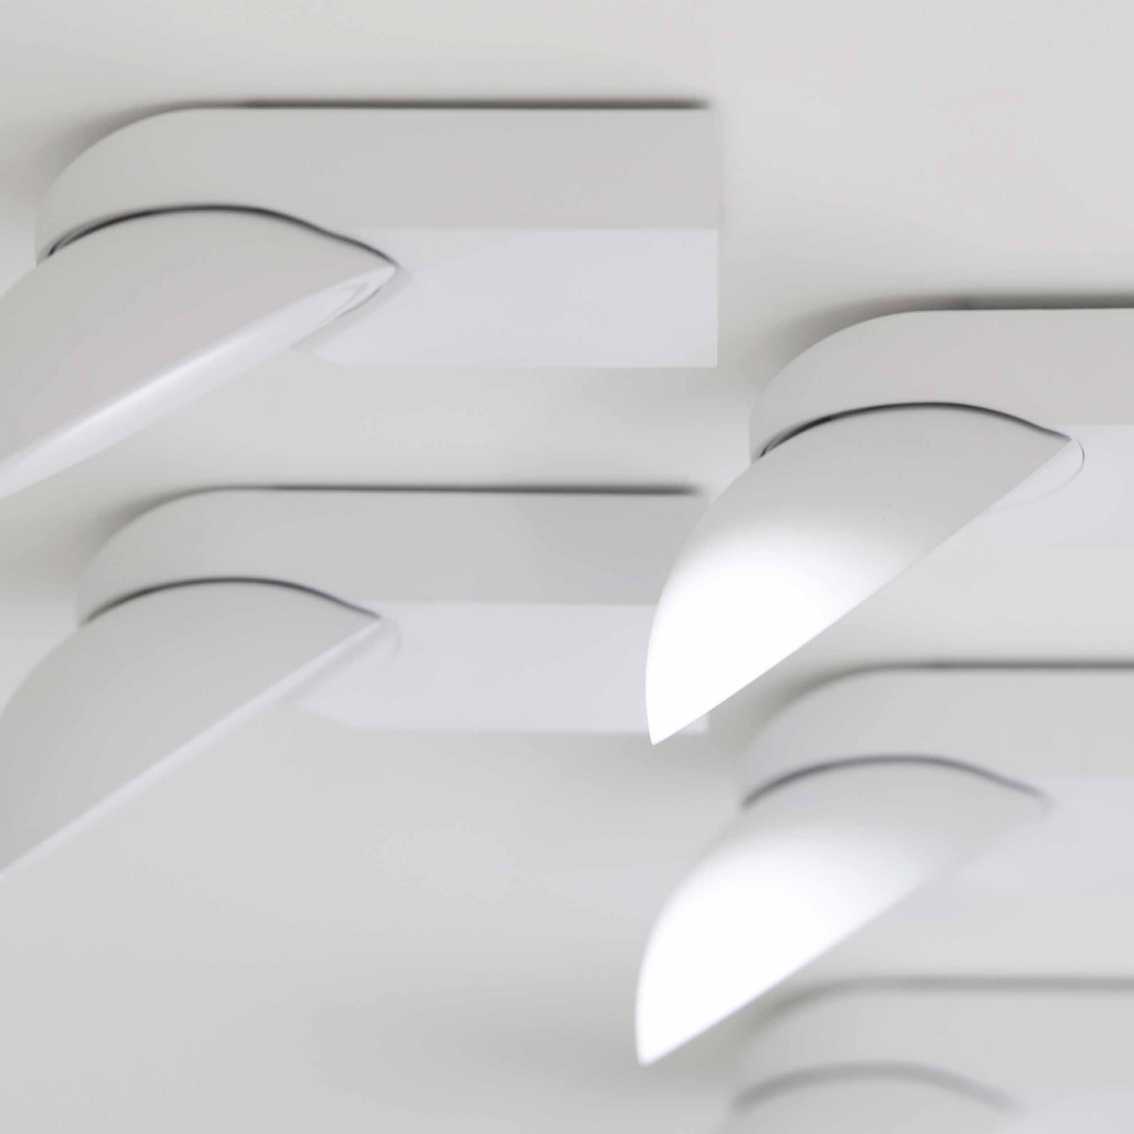

TWEETER ON

excels thanks to its
ingenious design, refined
to the last detail.

1/2

Available with single or double spot, **Tweeter On** comes with Delta Light's unique Reo led array technology, delivering a powerful, warm light.

A PERFECT BALANCE

between lighting quality and energy efficiency, adding value to the design statement of its environment.

The shells of both the **recessed** and the **surface** mounted versions are designed to provide optimal cooling, ensuring extended lifetime of 50.000 hours for the led series.

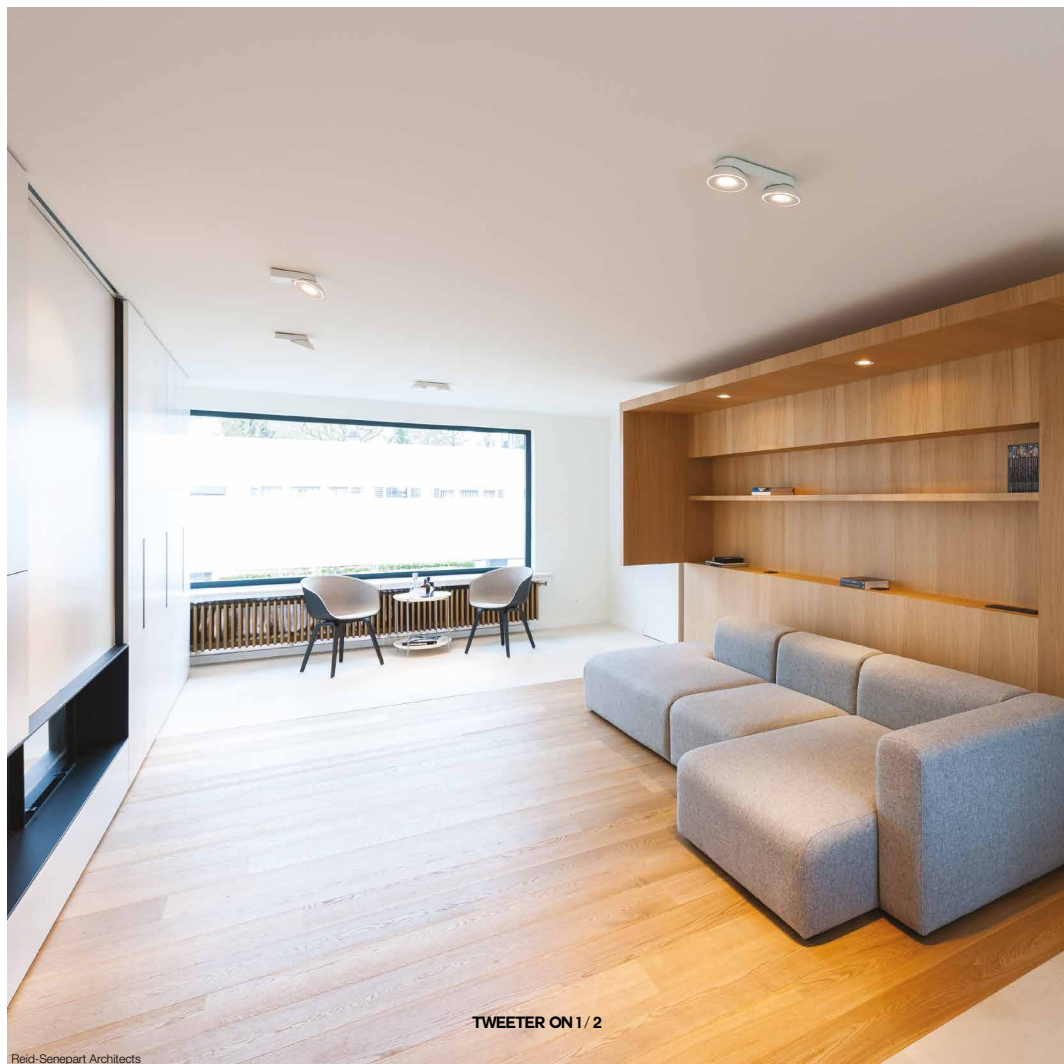

4

The **Tweeter On 4** is available as ceiling surface mounted or suspended luminaire.

OUTDOOR

The extremely manoeuvrable Tweeter is now making its presence felt in the garden in the shape of a wall fitting and posts for directional lighting. Ideal for creating highlights out of doors. One handy feature is that the outdoor models have the same rotation versatility as the indoor models.

Which means the lighting can 'grow' with the plants.

CTRL DELTA

WIRELESS CONTROL

An advanced lighting control solution based on the Bluetooth low energy standard. BLE is a state-of-the-art wireless technology. It is the only low power wireless technology available in all modern smartphones, tablets and smartwatches. This makes it the only mainstream power radiotechnology in the world. It is future proof and it is available now to control your lights.

For more information and technical info please go to
www.deltalight.com/CTRLDELTA

The CTRL Delta technologie creates an easy and user friendly platform for a contemporary lighting installation.
